Protozoological Abstracts

Protozoological Abstracts is a monthly journal which reviews medical and veterinary protozoology, deals with all parasitic protozoa, many endemic to the tropics. It started publication in 1977 and contains approximately 5,000 abstracts each year derived from the CAB ABSTRACTS and CAB HEALTH databases.

The CAB ABSTRACTS and CAB HEALTH databases are compiled from the world's scientific and technical literature. Over 40,000 published documents, including research papers, conference proceedings and papers, books, reports, patents and theses are received annually from more than 130 countries in 50 languages. This material is screened, translated, abstracted and indexed by professional and support staff, including 90 subject specialists and linguists. More than 170,000 new records are added to the databases each year, the majority containing informative abstracts. Over 3.5 million abstracts from the world literature have been added to the computerized databases since 1973, and this is complemented by a similar number in printed form before 1973, from CABI's origins in 1913.

EDITORIAL POLICY

Protozoological Abstracts is an abstract journal produced by the CAB INTERNATIONAL Information Institute (CABI-II). CABI-II's central function is the compilation of the CAB ABSTRACTS and CAB HEALTH bibliographic databases. CABI-II aims to achieve growth of its programme through new projects, often in collaboration with other organizations and backed by external funding, for the benefit of the international community.

Protozoological Abstracts is derived from the CAB ABSTRACTS database which covers the significant research and development literature in the fields of agriculture, forestry, aspects of human health, human nutrition, animal and veterinary science and the management and conservation of natural resources.

The CAB ABSTRACTS editorial policy is to:

- scan all relevant literature
- record comprehensively the most relevant and scientifically significant material
- record all bibliographic details accurately
- prepare informative, fact-filled abstracts for all items reporting new findings or reviewing original research
- write the abstracts in clear, concise, unambiguous English with consistent usage of terms and abbreviations
- index all important concepts within each record with the most appropriate terms selected from the CAB Thesaurus, CABI's controlled vocabulary.

This policy relies on the expertise of CAB INTERNATIONAL's 90 professional subject specialists and linguists who translate and summarise the international scientific literature in the subject.
